■ STUDIO AVAHA

Studio Avaha is a young, independent design studio located in the heart of India. Our approach is rooted in research, communication and heads-down designing, producing eccentric websites and DApps that stand out from the rest. We ensure that each project is a unique reflection of the client's vision.

HARDWARE ACCELERATING

ZERO-KNOWLEDGE PROOFS

GPU ACCELERATION

READY TO USE GPU-ENHANCED ZK PROVING
ACCELERATION?

To comprehensively support various new ZK Proof systems, Cysic has developed GPU based hardware acceleration solutions for major proof backends such as Plonky2, Halo2, Cnark, RapdSnark, and many more. Cysic's in-house GPU implementation outperforms several open-source frameworks. We utilize this GPU SDK to provide proof acceleration services for multiple top-tier ZK projects. Leveraging our in-house CUDA SDK, Cysic offers the most powerful, efficient, and user-friendly ZK hardware acceleration services to ZK projects worldwide.

001 CYSIC
NETWORK

002 ASIC
SOLUTIONS

Approach

With the aim of hyper-scaling the ZK revolution, Cysic is one of the best in what it does. This meant that their website could not have been anything lesser. With Cysic, we had to go above and beyond anything we had done before. Our approach was to keep it simple and futuristic at the same time, without taking away from their amazing work. To achieve this, we went back to the most basic of hardware - a motherboard and tried to make the coolest version of it possible. The products are displayed in Bento style boxes to keep it simple and easy-to-read.

ZK SNAP

ZK Snap is a verifiable off/on chain DAO voting with ballot privacy using Storage Proofs.

Approach

Our sole focus while creating the UI/UX for ZK Snap was to keep it simple and user-friendly. A bold and geometric font has been chosen, keeping in mind the black background. The Call to Action buttons have been made bigger in size than usual such that it is easier for the user to find.

03

Aerius labs

Aerius Labs is where cryptography, blockchain and zero-knowledge proofs converge to shape the future of secure systems.

ATHENA FINANCE

On-chain asset management for the Cosmos ecosystem, based on CosmWasm

ZK SNAP

Off-chain ballot privacy for DAOs, where voting is simple, anonymous, and user friendly.

01

FUTURE OF SECURE SYSTEMS

Aerius Labs is where cryptography, blockchain, and zero-knowledge proofs (ZK) converge to shape the future of secure systems.

Our team of experts specializes in cutting-edge technologies like Plonky2, Halo2, and Nova, bringing expertise to the realm of ZK proofs.

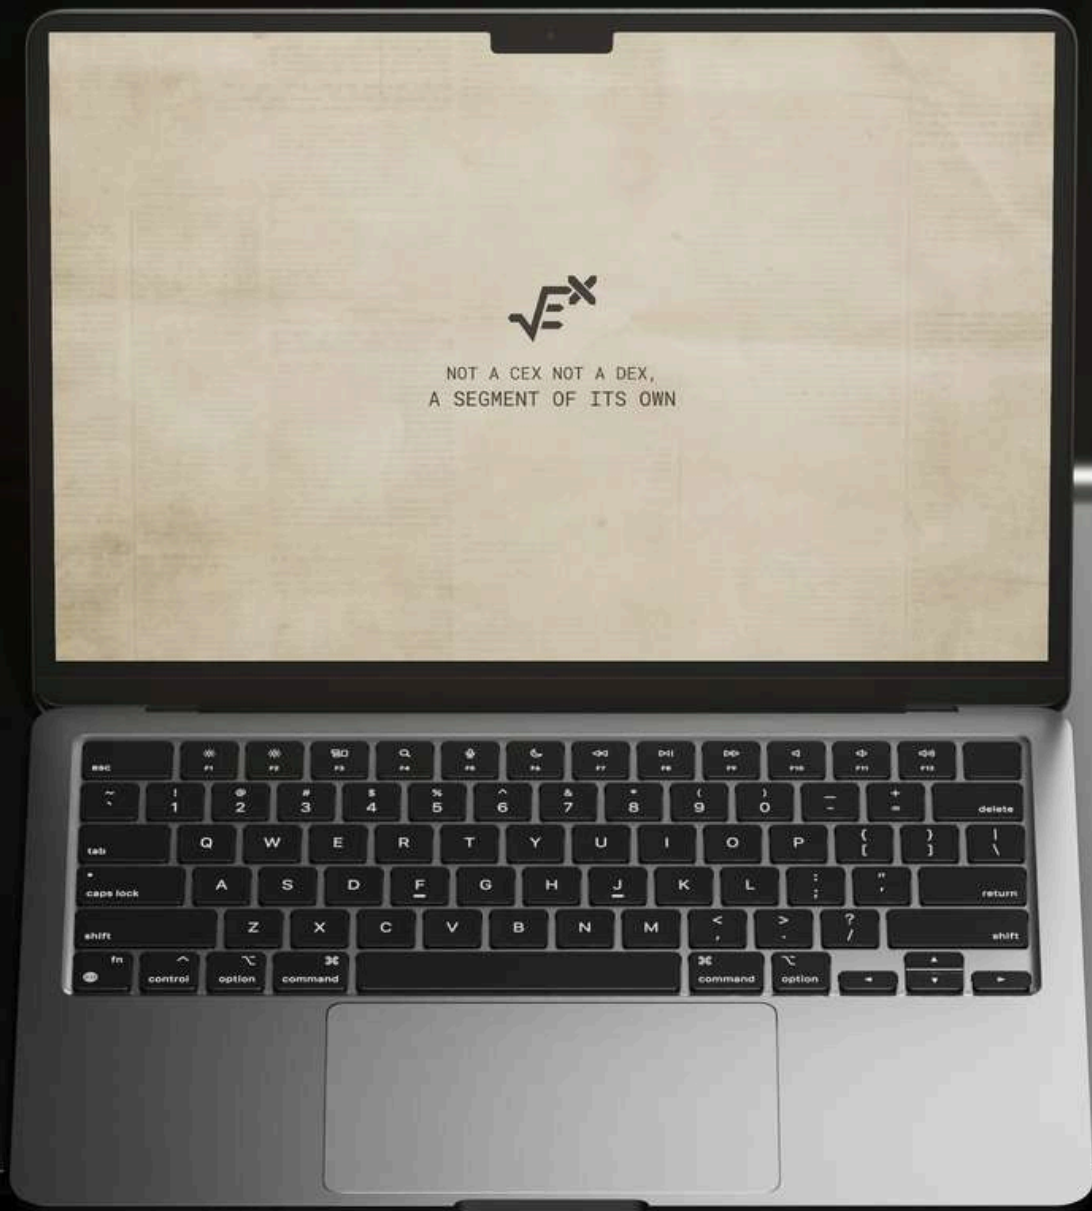

With a relentless pursuit of innovation, we strive to build trust, privacy, and efficiency into every solution we create.

Approach

Aerius Labs is a melting point of a lot of amazing things that Web3 has to offer. Their never ending thirst for innovation and exploration inspired us to use the 'Floating astronaut' theme. The background colour has been kept black with specks of pink to reflect the ever-expanding Space and the explosion of the logo is synonymous to the explosion of a star. The assets - the astronaut and the spaceship - have been made to resemble sci-fi themes, with a geometric and clean design.

Verifiable Exchange

Not a CEX
Not a DEX
A Segment of its own.

14/34

[Next](#)

We keep your vision at the center of our design process to turn the spotlight on your brand.

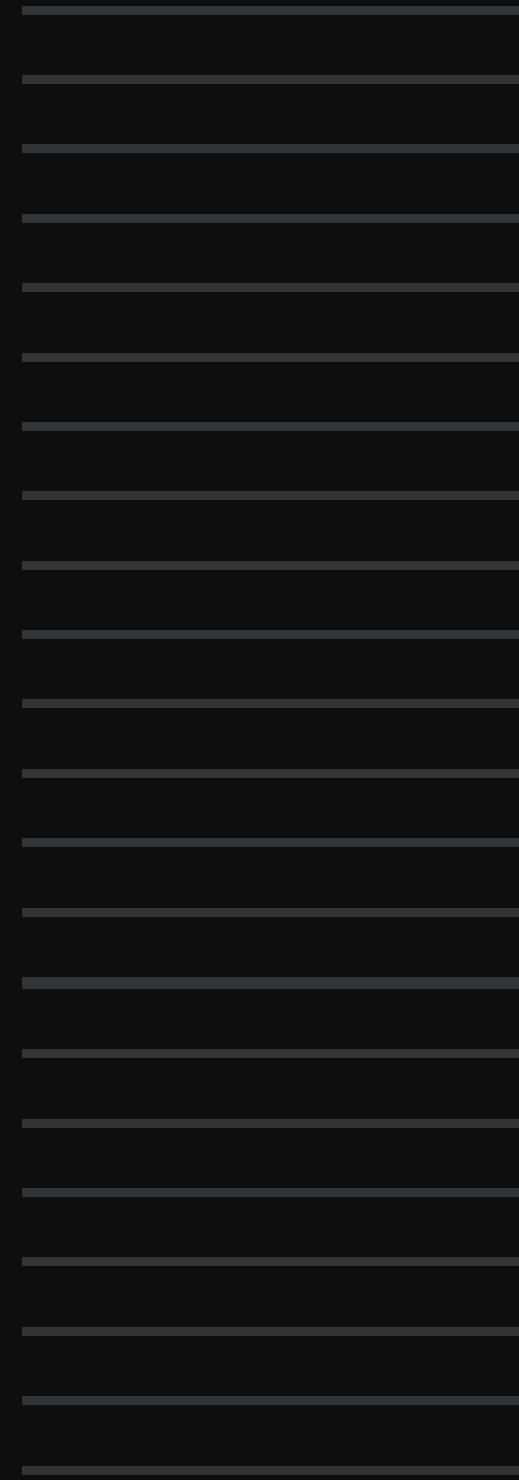

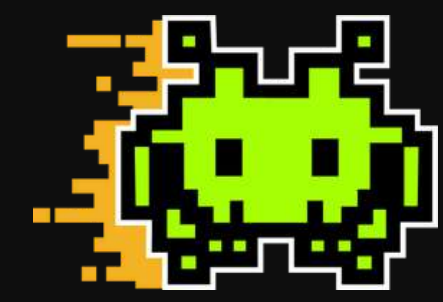

Work In Progress...

Approach

Landing Page - The newspaper inspired style acts as a visual metaphor, reminding the users the impact of the hacks, frauds and bankruptcies while the yellowish tinge given to the newsprint symbolises that with the launch of VEX such incidents would be a thing of the past.

Logo - Through the logo, we have tried to bring together the brand's name and the mathematical narrative that has made VEX possible.

Cracked Labs

Cracked Labs is the ultimate resource for Web3 and AI devs. Born from one of the largest developer communities in the world (HackerEarth), they empower the most innovative minds with challenges, incubators, accelerators, and a global network of top-tier talent.

Our Global Presence

With a footprint that spans over 40 countries, MediCure Pharmaceuticals is a trusted name in the global pharmaceutical industry. We pride ourselves on our ability to adapt to the unique needs of each market while maintaining our core values.

Our Brand

Our Global Presence

Our Commitment to Community

Our Products

We specialize in developing advanced pharmaceutical formulations designed to meet the diverse needs of patients and healthcare professionals. Our product portfolio encompasses a broad spectrum of therapeutic areas, each backed by rigorous research and state-of-the-art technology.

Global CSR Awards

for our impactful health education programs.

Biologics

Our API manufacturing plant located at Manesar, New Gurgaon City in Gurugram is one of the largest integrated antibiotic manufacturing complexes in India and specialises in the manufacture of cephalosporin active pharmaceutical ingredients (APIs).

Emerging market

Regulated market

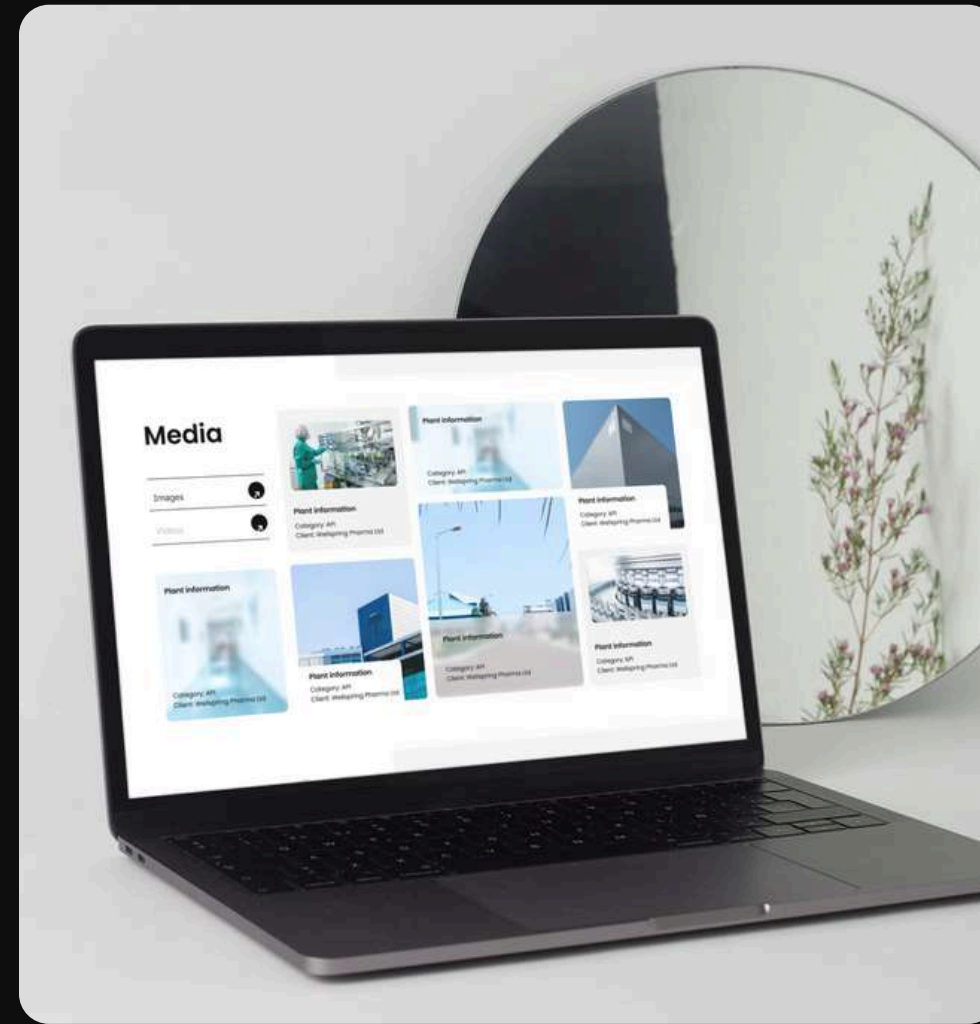

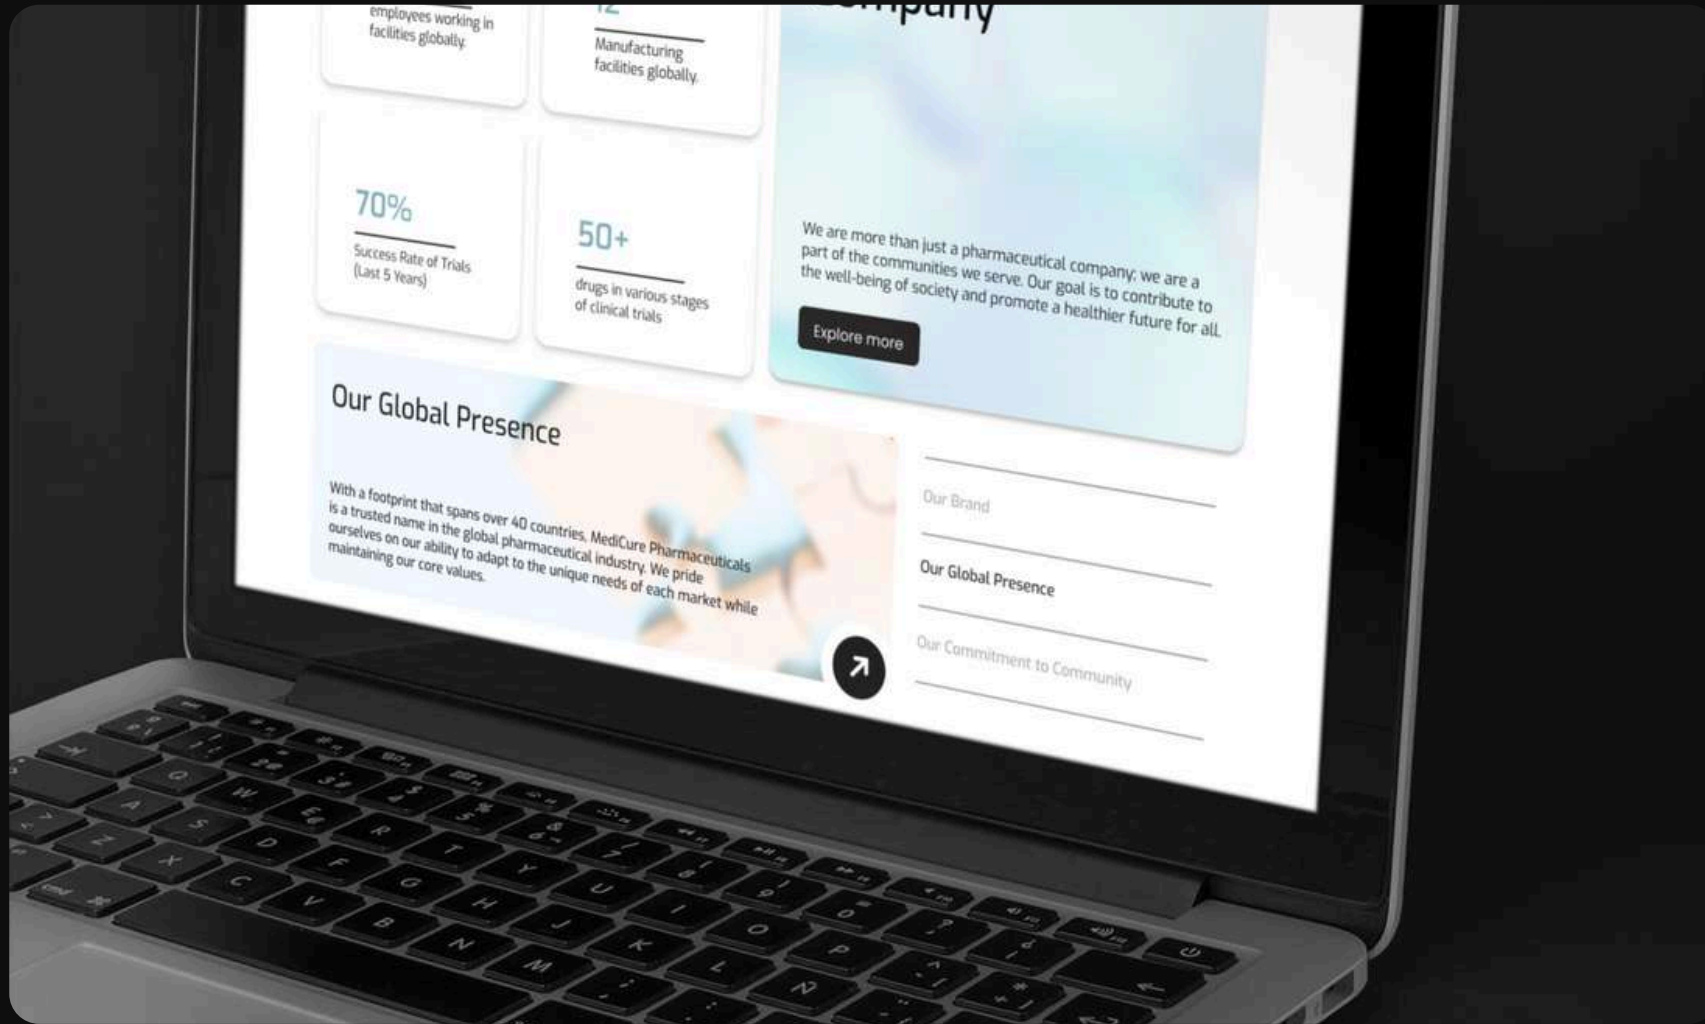

GENERIC

Our mission of providing affordable medicines across many therapeutic areas globally is duly supported by the relentless efforts of our team of over 300 dedicated and talented scientists.

Abacavir Sulphate

Abiraterone Acetate

Albendazole

Approach

Designs for healthcare and pharmaceutical companies typically favour pastel colours, to evoke a sense of well-being and serenity. With this in mind, we selected a palette of blue and white with hints of pink. The font choice is round and simple, contributing to a feeling of ease. The homepage has been designed to give the user the most essential information, without overwhelming the space, ensuring that there is a balance between the white spaces and the text.

Approach

This website was created for NFT fanatics who take their music seriously. Being a DApp, the design has been kept clean and smooth with a hint of suave and vibrance. The landing page would display the trending artists along with their NFTs. While this project is still in progress, we could not help show it off!
