We keep your vision at the centre of our design process to turn the spotlight on your brand.

## ■ STUDIO AVAHA

Studio Avaha is a young, independent design studio located in the heart of India. Our approach is rooted in research, communication and heads-down designing, producing eccentric websites and DApps that stand out from the rest. We ensure that each project is a unique reflection of the client's vision.

### DESIGN PROJECT

We help your brand navigate through the static to reach the right audience by making it stand out.

# HARDWARE ACCELERATING

ZERO-KNOWLEDGE PROOFS

## GPU ACCELERATION

READY TO USE GPU-ENHANCED ZK PROVING  
ACCELERATION?

To comprehensively support various new ZK Proof systems, Cysic has developed GPU based hardware acceleration solutions for major proof backends such as Plonky2, Halo2, Cnark, RapdSnark, and many more. Cysic's in-house GPU implementation outperforms several open-source frameworks. We utilize this GPU SDK to provide proof acceleration services for multiple top-tier ZK projects. Leveraging our in-house CUDA SDK, Cysic offers the most powerful, efficient, and user-friendly ZK hardware acceleration services to ZK projects worldwide.

001 CYSIC  
NETWORK

002 ASIC  
SOLUTIONS

## ASIC SOLUTIONS

GENERATE ZERO-KNOWLEDGE PROOFS IN REAL TIME

We have designed the zkVM-based chip, the Cysic C1 chip, which lays down the foundation of real-time ZK proof generation. Based on this chip, we provide two hardware products, the portable ZK Air and robust ZKPro.

According to the current product road map and design plans, these products are expected to be released in 2025.

## CYSIC NETWORK

A DYNAMIC PROTOCOL OFFERING ONE-STOP ZERO-KNOWLEDGE PROVING AND VERIFICATION

Key benefits of the Cysic network:

- **High Performance:** With Cysic's leading hardware acceleration techniques and enormous hardware resources, ZK proofs can be generated and verified at blazing fast speeds.
- **Permissionless to Join:** Whether you are working on ZK projects, as provers, or as verifiers, you can join the Cysic Network by deploying ZK proof tasks, computing tasks, or verifying ZK proofs.
- **Low Cost:** Enjoy unbeatable low costs for generating and verifying ZK proofs.

# Tokenise

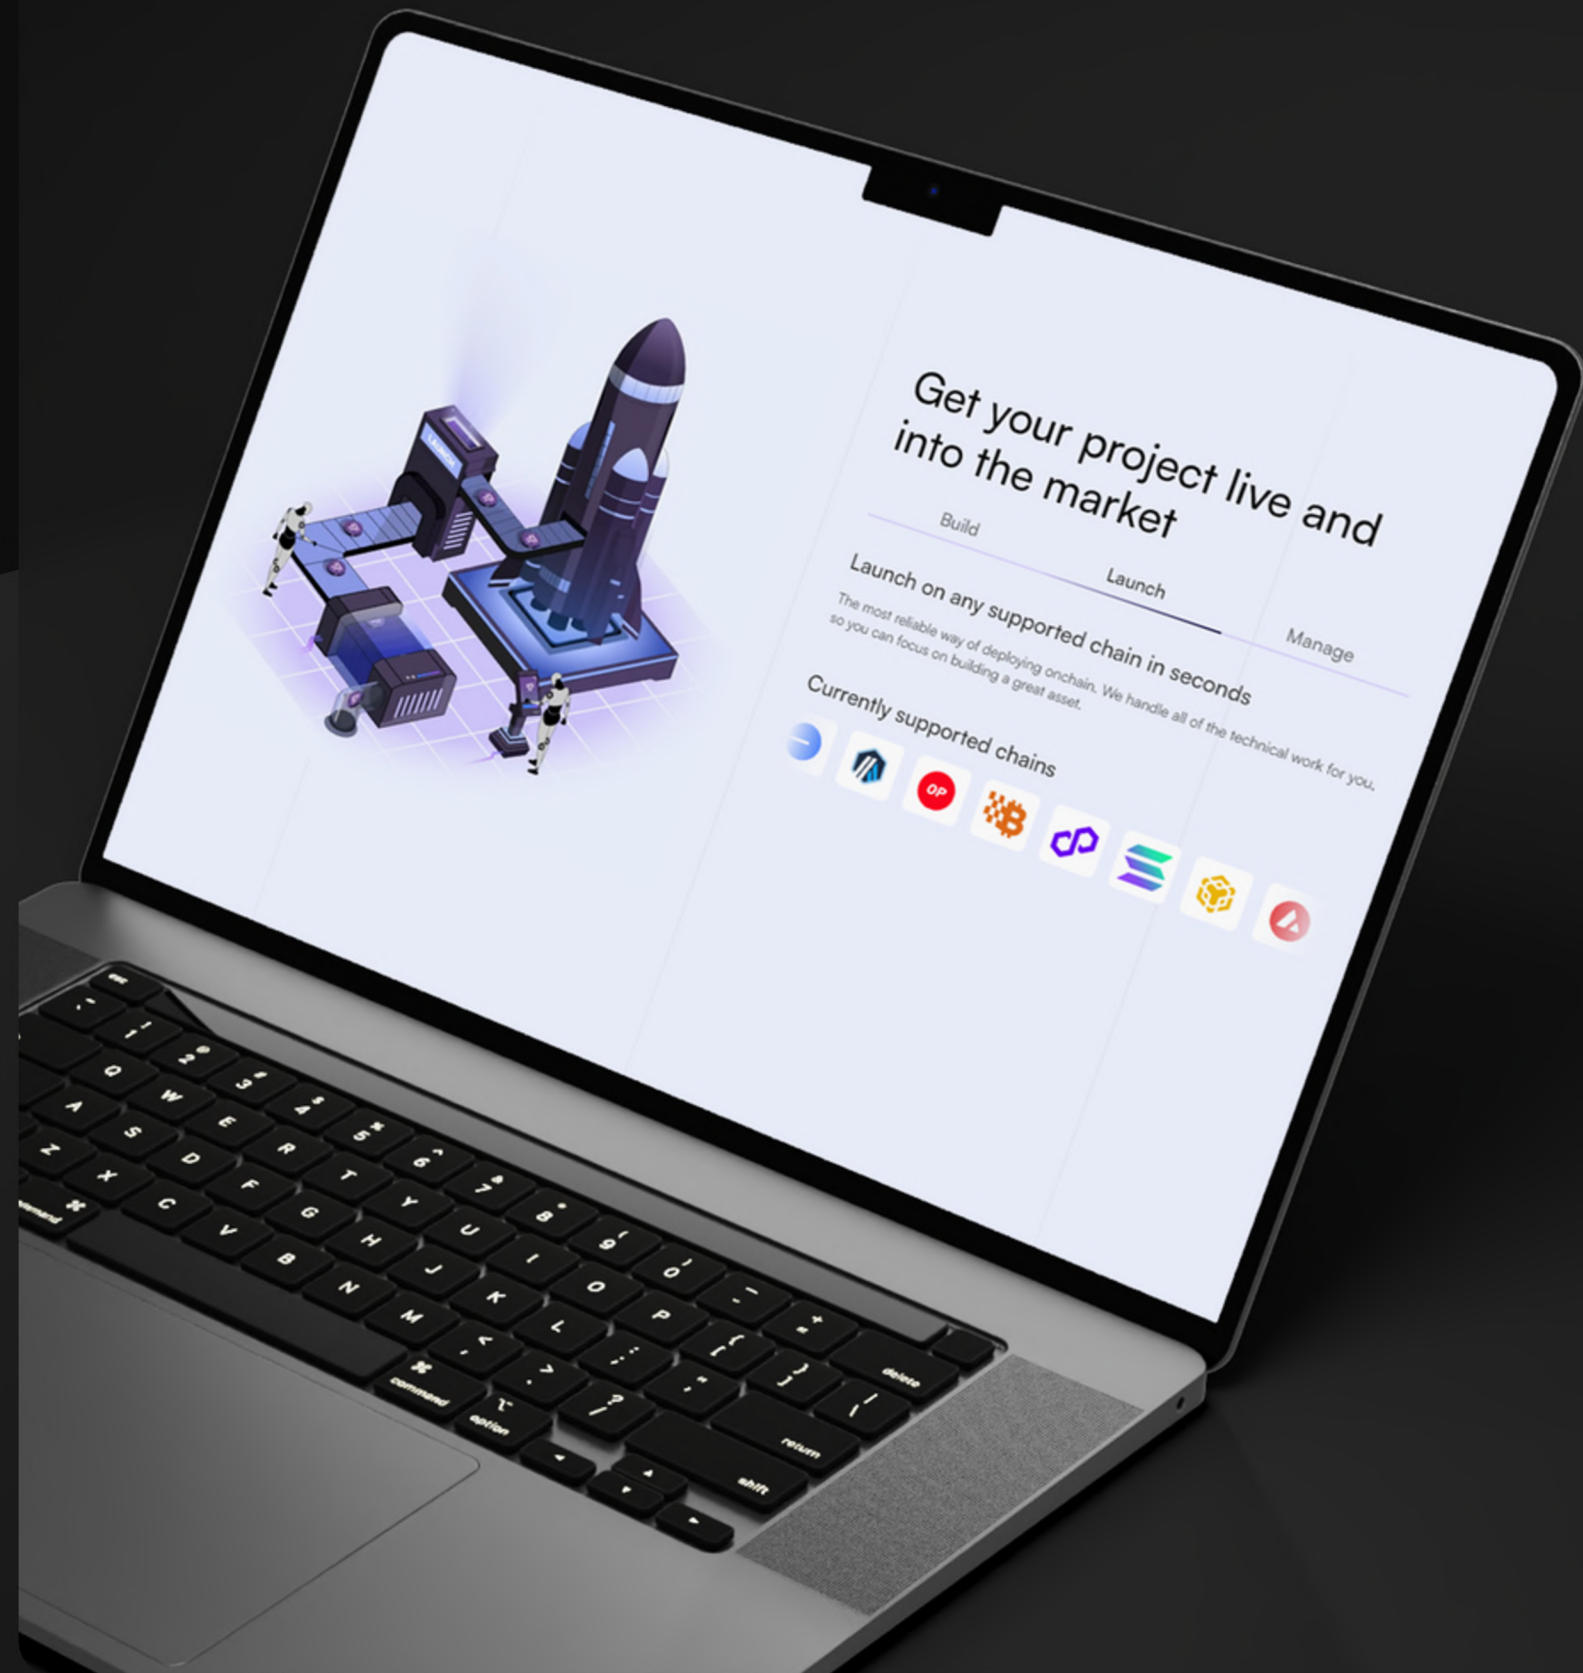

Everything you need to build, launch and manage digital assets, in one, simple platform.

## SERVICES ↘

- | Illustration | Animation
- | Web Design | Web Development

We keep your vision at the center of our design process to turn the spotlight on your brand.

## Get your project live and into the market

Build    Launch    Manage

**Create your assets using robust economic models**

Get ahead of potential issues by looking at sell pressure, liquidity pool ratios and other high risk areas.

**Build a home for your project and its assets**

Forecast the life of your asset including price, adoption curves, market capitalisation and more.

## Get your project live and into the market

Build    Launch    Manage

**Manage your asset and project natively within Tokenise**

Build enriched data rooms that host your most vital information including cap tables, investor deal flow, price, market cap, supply and so much more.

Compare your live asset data with simulations on different market conditions and sentiments.

2025

## Execution Mode

Bringing Your Vision to Life

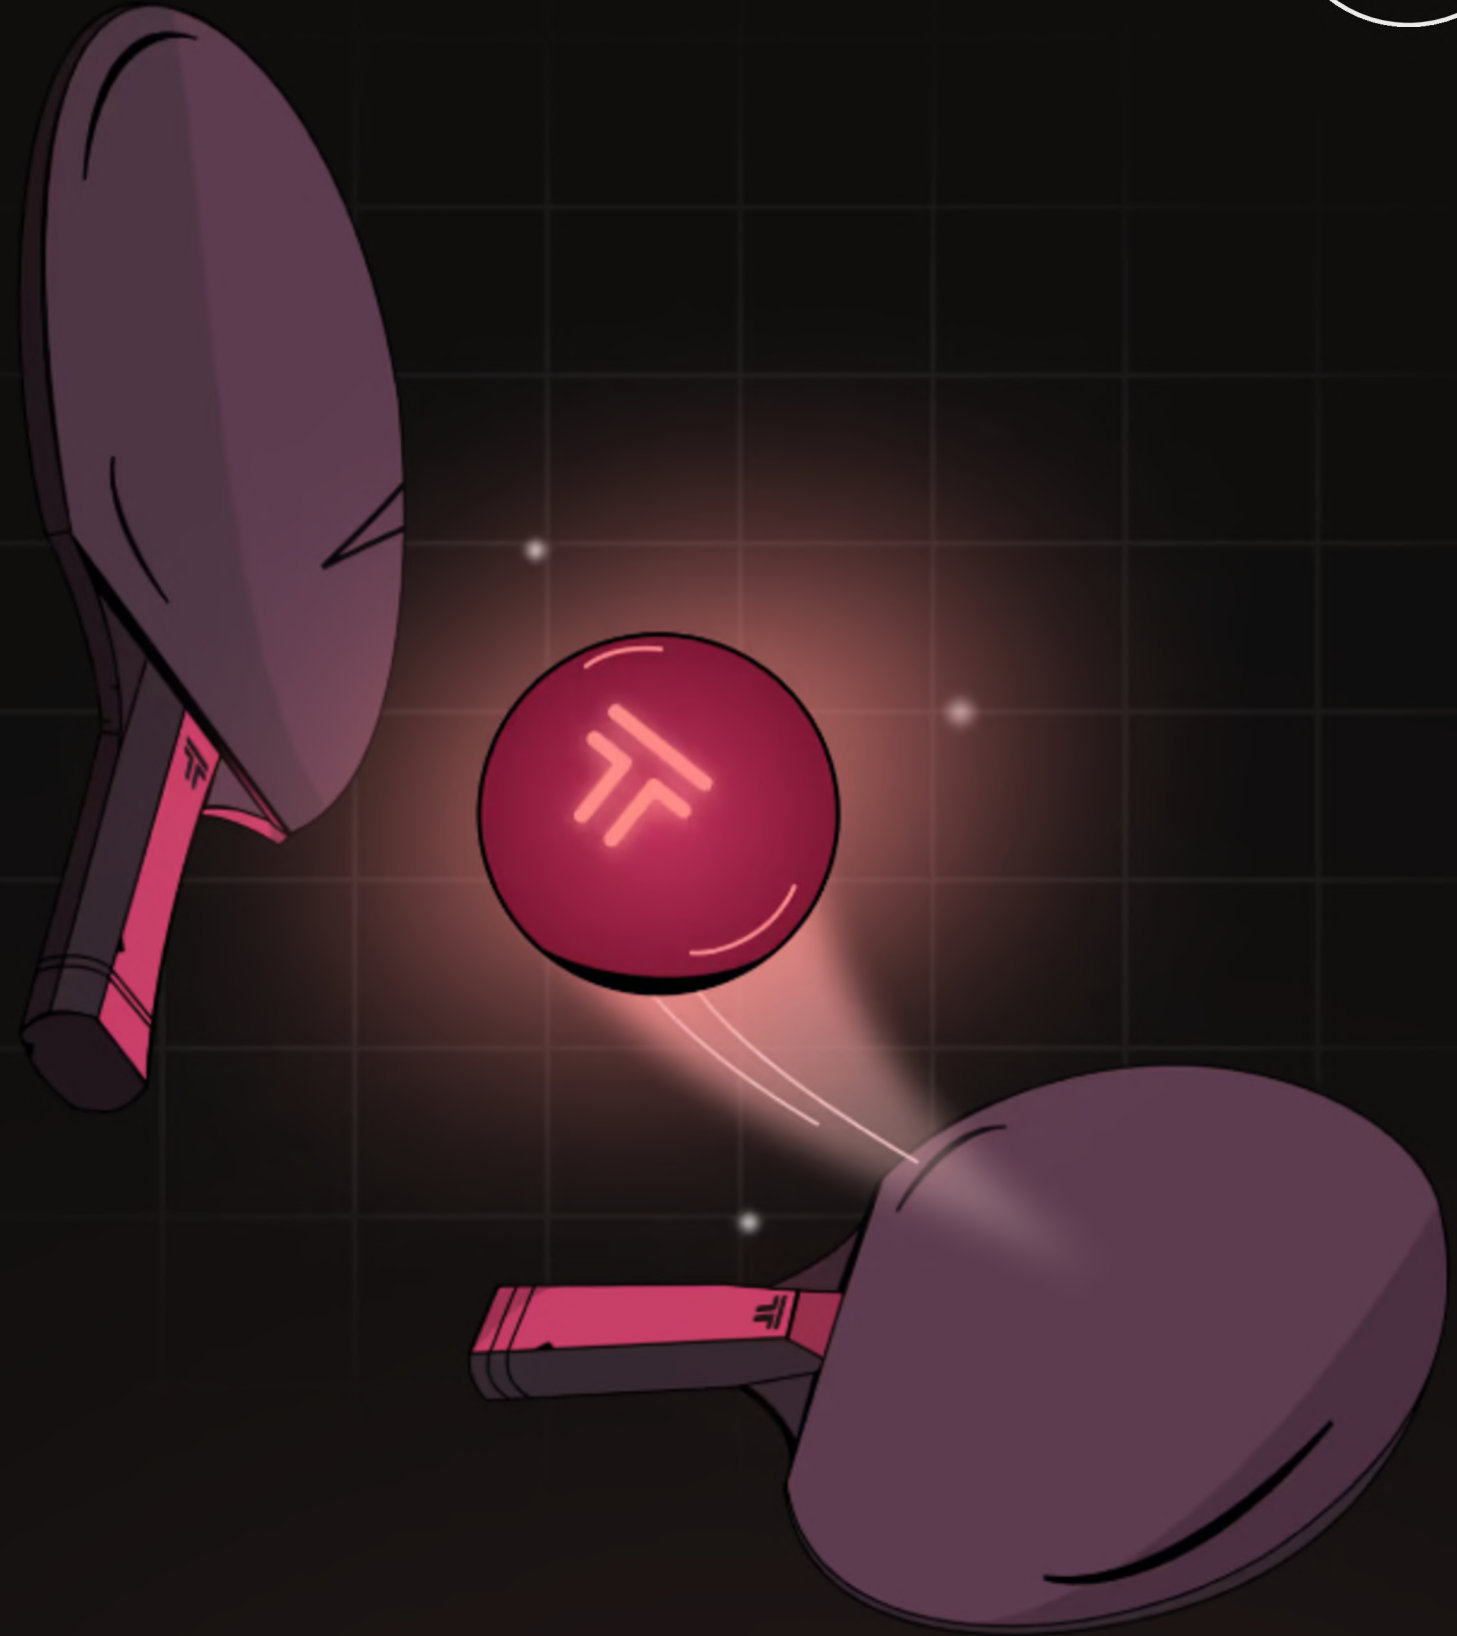

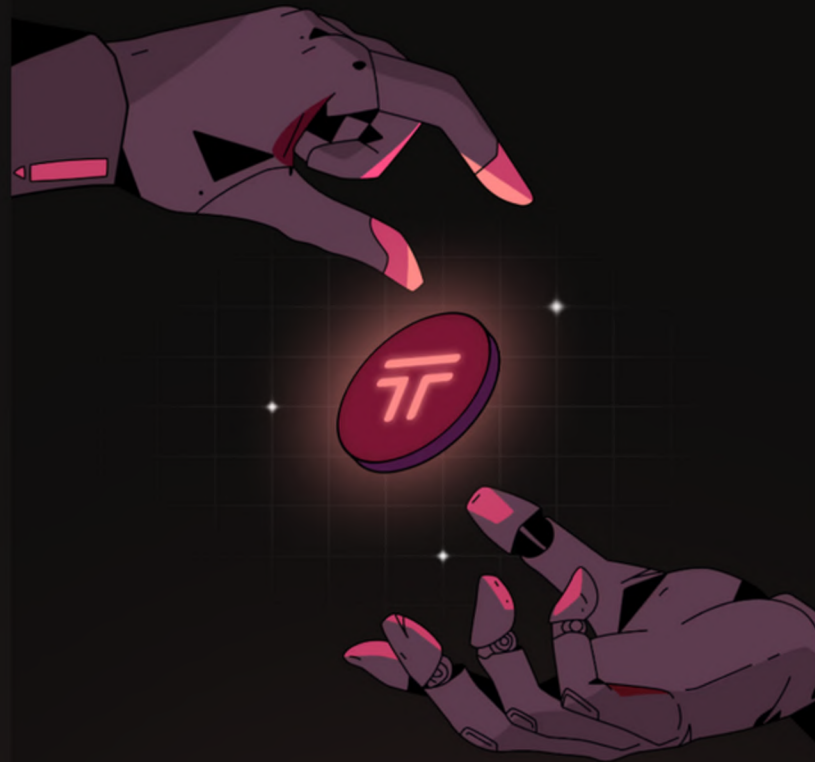

Once the strategy is approved, we move into action. This phase includes token design, engaging investors, building the token economy, and preparing for the Token Generation Event (TGE).

## Initial Consult

Understanding Your Needs, Laying the Foundation

We have an initial conversation to assess client needs and build an understanding of where Tokenise best fits into the current project structure.

# HYVE Labs

Deliver rewarding social GameFi experiences that you can play seamlessly across any platform

## SERVICES ↘

[Next](#)

We keep your vision at the center of our design process to turn the spotlight on your brand.

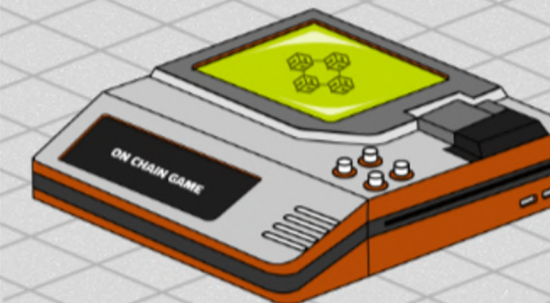

**One game distributed without walled gardens**

Play games anywhere and on any device with one log-in

**Easy to pick-up, hard to master**

Fun, social and competitive games that keep bringing users back

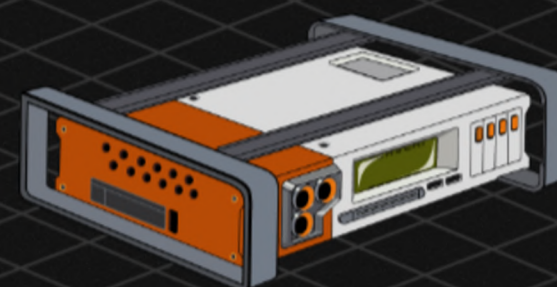

**Web3 and AI enabled**

The Hyve infrastructure provides the tech required to build the next generation of games

**Ubiquitous Games Distribution**

One user identity (wallet) to launch a game in a single click from any platform

**Hyve Infrastructure**

The Hyve chain provides the framework for easy game development with on-chain identities, modular game servers, social features and transactions

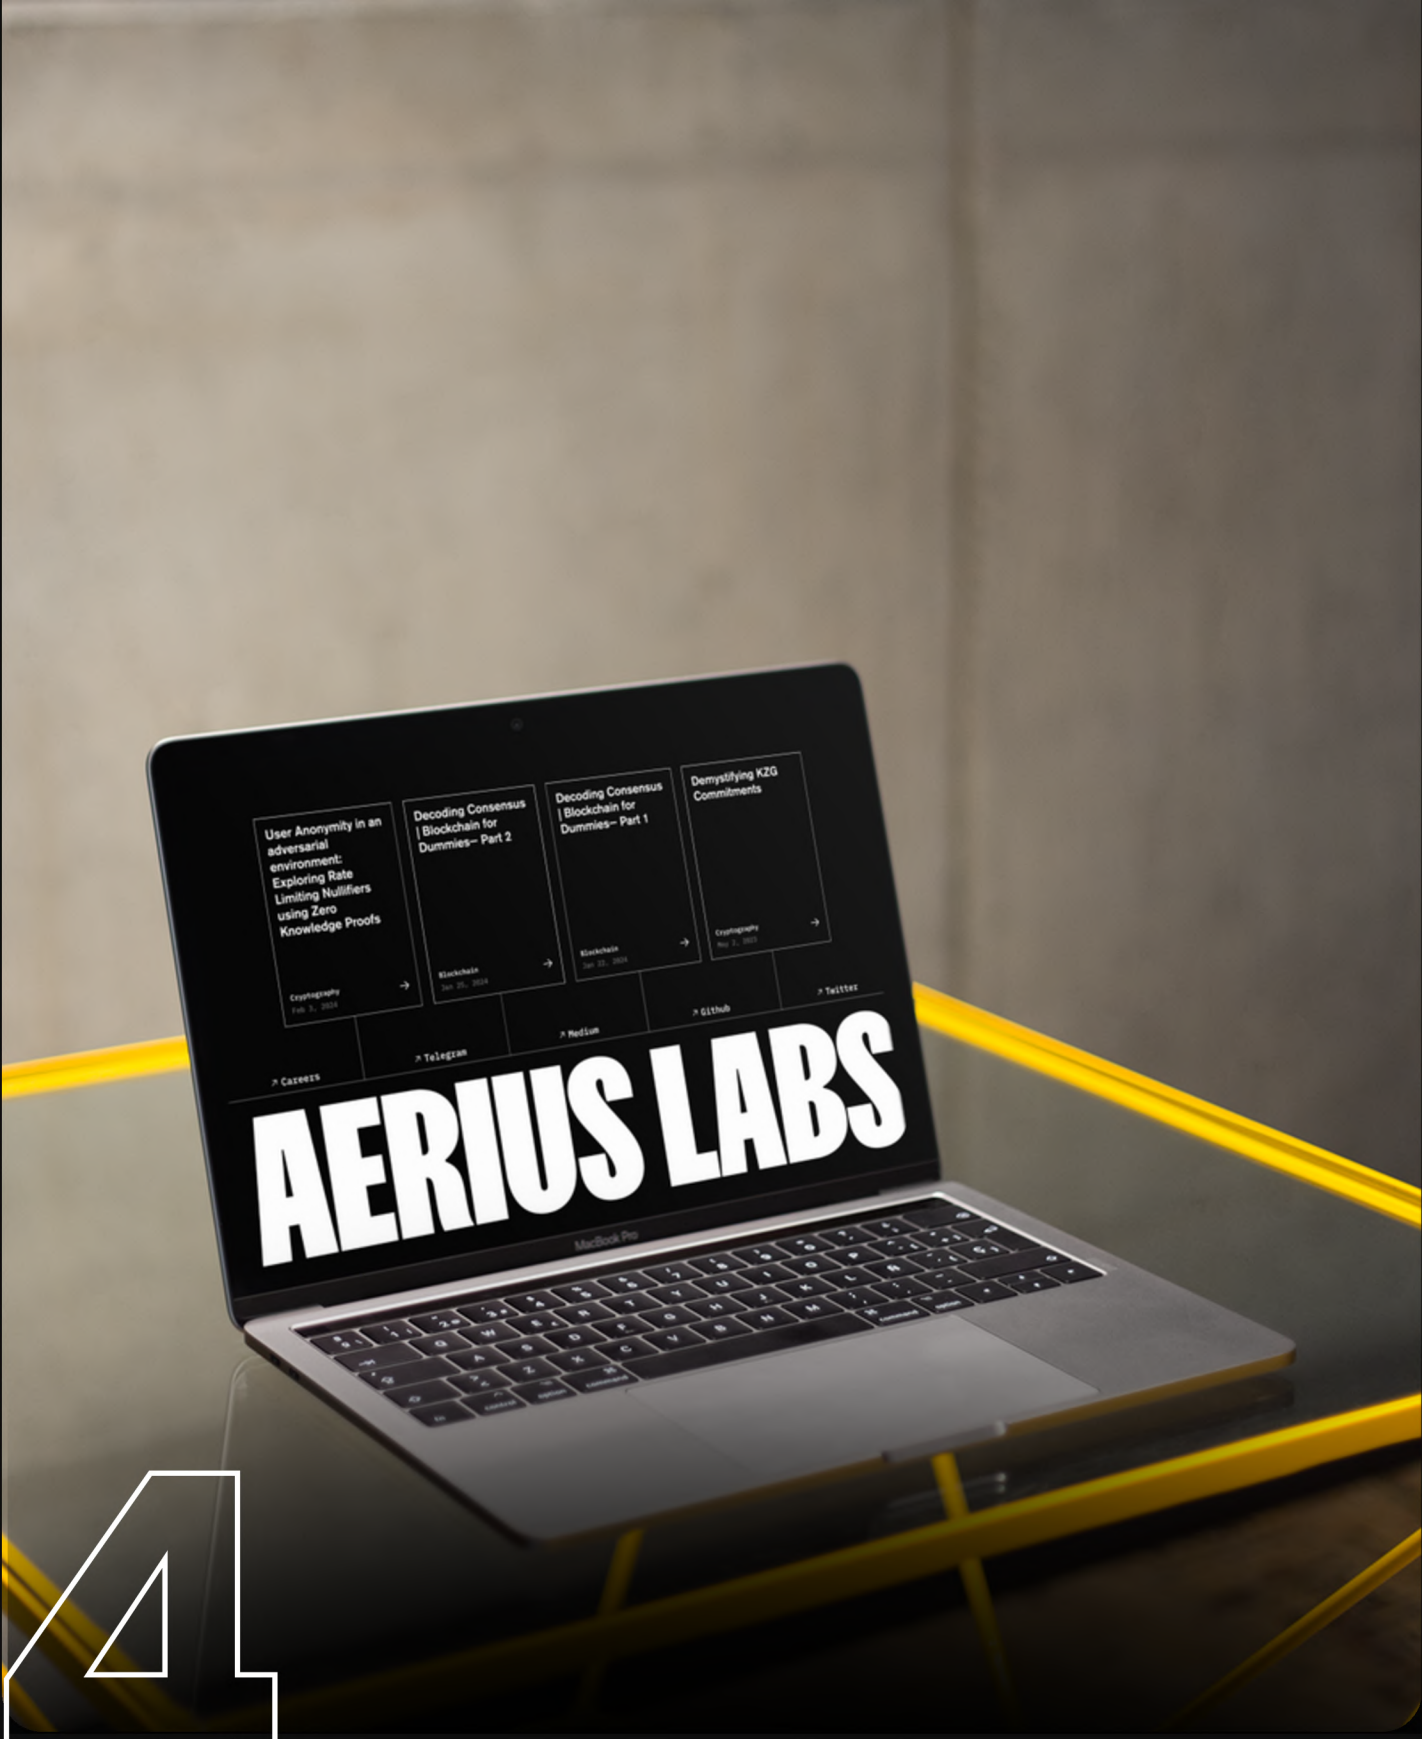

**Best-In-Class Live Operations and Data**

Maximize user attribution, engagement, monetization, and retention through continued learning and optimization

### ATHENA FINANCE

On-chain asset management for the Cosmos ecosystem, based on CosmWasm

### ZK SNAP

Off-chain ballot privacy for DAOs, where voting is simple, anonymous, and user friendly.

01

## FUTURE OF SECURE SYSTEMS

Aerius Labs is where cryptography, blockchain, and zero-knowledge proofs (ZK) converge to shape the future of secure systems.

Our team of experts specializes in cutting-edge technologies like Plonky2, Halo2, and Nova, bringing expertise to the realm of ZK proofs.

With a relentless pursuit of innovation, we strive to build trust, privacy, and efficiency into every solution we create.

# ZK SNAP

ZK Snap is a verifiable off/on chain DAO voting with ballot privacy using Storage Proofs.

## ABOUT US

Fast, Secure, and Fully Transparent

We are a team with a proven track record of scaling and growing Celestia, LI.FI, Ren Protocol, and Aerius Labs from the ground up. Unlike traditional exchange operators, we didn't come from legacy brokerage firms, and that's intentional.

Our goal isn't to maximize revenue from each user but to define what an exchange should be like. What we're building is not just an evolution but the foundation of how an exchange should be. Until now, no one has done this before and to us, it wasn't just about doing what we can do, but about what no one else will do.

## TRADE ON YOUR TERMS

Fast, Secure, and Fully Transparent

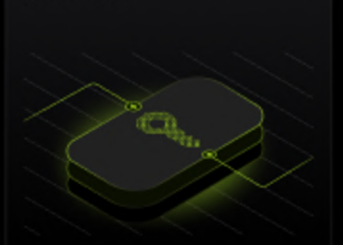

### 100X FASTER THAN A DEX

Being an off-chain orderbook, we are not limited by blockchain speed. With each new asset pair created, VEX allows unbounded horizontal scaling.

### NON-CUSTODIAL

Traditional exchanges trade on your behalf. Here, you trade on your own.

### SECURITY

All transactions are verifiable and settled on-chain. So if you trust blockchains, you can trust VEX.

### FULL TRANSPARENCY WITH ZK-PROOFS

All off-chain orderbook transactions are fully verifiable on-chain using zk-proofs, giving us the speed, security and transparency.

### TRADE ANY ASSET WITH ANY ASSET

No wrapped asset trading. Native tokens with native settlement.

### YOUR CONTROL

The exchange includes automatic escape hatches that trigger if the exchange fails to produce valid proofs.
